

# Overview of Design:-

## User Interface:-

## Specifications:-

- 1) The Four Set buttons are used to change the 4 digits on it.
- 2) Format is used to change the hh:mm format or the mm:ss format.
- 3) The flashing dot shows you are viewing in the hh:mm format.

## Features:-

- 1) You can view the time in both hh:mm format & mm:ss (one at a time).
- 2) In the hh:mm format the 4th dot flashes every sec. This will keep track of seconds upto some extent.
- 3) You can reset the time to any value using the 4 set buttons.
- 4) While changing time, you don't have to worry about stumbling upon absurd timings like 27:65 (hh:mm). This has all been taken care of such that time is between 00:00:00 to 23:59:59.

## Instructions:-

(i) To switch to different modes:-  
The initial format is hh:mm.  
To change to mm:ss press the Format button.  
To switch back to the hh:mm mode press the Format button again.

(ii) To change the timing:-

(a) To reset to 00:00:00.  
First make the time in hh:mm format as 00:00.  
Now change the format to mm:ss.  
Now make the time 00:00.

(b) To make other Random times  
→ Set1 will increase the leftmost digit by 1.  
→ Similarly Set2, Set3, Set4 change the individual digits.  
→ Example you want to change time from 17:39 to 22:42 (in hh:mm) then what you

Precaution:- have to do is

This order can't be changed since 17 changes to 07 (because 27 not allowed)

- (1.) Press Set2 5 times.  
[ 17:39 → 18:39 → 19:39 → 20:39 → 21:39 → 22:39 ]
- (2.) Now Press Set1 - 1 time  
[ 22:39 → 22:49 ]
- (3.) Press the Set3 1 time  
[ 22:49 → 22:40 ]
- (4.) Press the Set4 - 3 times  
[ 22:40 → 22:41 → 22:42 ]
